SUMMARY

Frontend Developer with over 2 years of experience in building and maintaining user-friendly, high-performance web applications. Strong background in microservices, low-latency search algorithms, and team leadership.

WORK EXPERIENCE

Frontend Developer, Jana Post (Almaty)   May 2023 – Present
– Developed and maintained client website ensuring stability and user convenience.
– Built an admin panel for effective internal process management.
– Integrated WebView into mobile apps and connected external services.
– Conducted testing and debugging of developed functionality.
– Optimized UI/UX for improved customer experience.

Frontend Developer, SDU Technopark   Oct 2021 – Apr 2022
– Migrated internal CRM system from jQuery to Vue.js with Pinia and modular routing.
– Integrated CMS with Nuxt and deployed on Vercel and Netlify.
– Set up CI/CD pipelines and automated deployments using GitHub Actions.

EDUCATION

2024 – present   **Suleyman Demirel University (SDU)**, Faculty of Engineering and Natural Sciences – Information Systems   (GPA: 3.2/4.0)

PROJECTS

- **Computer Vision Research:** Developed and implemented algorithms for multiclass object recognition in images using Python, OpenCV, and deep learning frameworks.

- **Java Application (Spring):** Built a learning project with Spring Boot, focusing on backend APIs, REST services, and database integration.

- **Data Analytics with Pandas:** Analyzed large datasets, created statistical reports and visualizations using Python (Pandas, Matplotlib).

CERTIFICATES

2022   nFactorial Incubator
2024   Python, Django, Data Science and ML

SKILLS

Programming: JavaScript, TypeScript, Python, SQL, HTML5, CSS3, Git, Node.js
Frameworks: React, Vue3, Nuxt.js, Next.js, Nest.js, Django, React Native
Professional Skills: Problem-solving, Analytical Thinking, Documentation Writing, Security Testing, Communication, Multitasking
